Datavision at HITEC Toronto 2017

What a great time at HITEC in Toronto and HSMIA! We saw many customers, colleagues, and friends. The Datavision booth was in a great location and it is always fun to meet some new potential customers.

This year's HITEC had the highest attendance ever in its 45 years. Start making plans to attend next year in Houston, June 18-21. Get those cowboy boots out. You never know what adventures may be in store for you there!

Planning an upgrade of your PMS, Changing your Sales & Catering system or Changing your POS?

Do you plan any upgrades for new versions? Remember to let Datavision know if you are changing versions in your current system, please notify support 3-4 weeks ahead of the conversion time. If you are changing vendors or would like to add new modules, please reach out to Sherry Marek. smarek@datavisiontech.com

New from Datavision

Datavision is exploring PowerBI and its ability provide self-service Dashboards. More details on this next month!

After registering you will receive a confirmation email containing information about joining the training.

Here is a question covered in the last webinar.

“My property needs a Group Pickup Report that shows the current list of group Names/IDs with their upcoming arrival date. I need to see the week over week pickup. I would like to see the groups arriving in 45 days and see their weekly pickup for the past 8 weeks.” And we created that report during the call!

Information Technology Corner

Are you applying your Microsoft patches at least quarterly, if not more frequently? DV recommends that you reboot your MS SQL server once a month.

Please contact DV support if you have questions on either issue.

Meet Datavision at these future locations:

Hotel Data Conference in Nashville, August 9-11, 2017
